DETAILED ACTION

This action is in response to papers filed January 12, 2007,

Claims 1, 3-8, 10-16, 18-20 and 22-25 are pending.

C Claims 1, 3-8, 10-16, 18-20 and 22-25 stand rejected.

Response to Arguments

1. Applicant's arguments filed January 12, 2007 regarding the prior art rejections under 102(e) have been fully considered but they are not persuasive.
2. Applicant argues that Suliman teaches that a user enters registration information and requires additional security. The examiner notes that applicants claims merely state receiving information. The limitation does not preclude the information being received from input by the user. Applicants is not claiming the input of information without the interaction of a user.
3. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., home network system) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). These limitations were not part of the claims or considered at the time the rejection was made.
4. Applicant's arguments, regarding the rejections under 35 USC 112 with respect to enablement issues the arguments have been fully considered and are persuasive. The 112 1st and 2nd rejections of 1, 3-8, 10-16, 18-20 and 22-25 have been withdrawn.
